Evolution of CERN Print Services

Tuesday, 11 October 2016 16:30 (15 minutes)

CERN Print Services include over 1000 printers and multi-function devices as well as a centralised print shop. Every year, some 12 million pages are printed. We will present the recent evolution of CERN print services, both from the technical perspective (automated web-based configuration of printers, Mail2Print) and the service management perspective.

Primary Keyword (Mandatory)

Collaborative tools

Tertiary Keyword (Optional)

Secondary Keyword (Optional)
