Update on CERN Search on Sharepoint 2013

CERN's enterprise Search solution 'CERN Search' provides a central search solution for both users and CERN service providers. Public and protected documents from a wide range of documents are indexed and available for retrieval.

The new version of CERN Search based on SharePont 2013 features:

- High availability and high reliability setup.

- Entities and binary files indexation.

- Indexation and retrieval of protected documents.

- Easier maintenance for admins.
