

Highlights: Networks in ATLAS

- ATLAS has a working infrastructure in place to monitor, measure, debug and our networks
 - perfSONAR provides lots of capabilities to understand and debug our networks
- Work on new applications is underway
 - Notifications/alerting
 - Predictive capabilities
 - Current utilization and capacity planning
- New analytics capability for network and transfer metrics now available
- Network capabilities will evolve based upon commercial goals; ATLAS should be ready to take advantage of what becomes available if it makes sense.
- Planning networking efforts underway; Pre-GDB set for January 10th 2017.
