

Opportunistic data locality for end user data analysis

- Prototypical Middleware for Coordinated Caching
 - Coordinate individual caches on WNs
 - Avoid duplication, align job and data location
 - In production with HTCondor + POSIX
- Caching infrastructure deployed as service
 - Batch System/Cache running on kernel 4.X
 - Arbitrary jobs executed via docker
 - Combines modern technology and HEP
- Experimental setups for clouds
 - VM-local caches for XROOTD access
