EOS developments
- Highlights -

Elvin Sindrilaru - on behalf of the
EOS team and IT Storage Group

CHEP 2016 – San Francisco

Highlights

- EOS architecture

- **EOS FUSE** status and improvements
  - Meta-data caching improvements
  - Latency optimizations: lazy-open and asynchronous open

- **EOS Kinetic integration**
  - Local cluster configuration
  - Multi-path configuration and benefits

- **EOS namespace**
  - New namespace plugin architecture
  - Namespace prototype built on top of Redis
  - Future direction using RocksDB and Redis protocol implementation for XRootD
