

Working Group 6: Microcosm (and other visit points)

We are seeking for the answer to the following question:

What would a teacher dream of having before coming on a visit to CERN with her/his class?

- Different things for different visit points?
- Texts?
- Activities?
- What else (cit. George Clooney)?

Three phases:

1. Draft your dream list now (before knowing too much about CERN)
2. Explore CERN, its exhibitions and its visit points
3. Focus on ***ONE*** (yes, only ONE) thing that you think should really be provided by CERN to visiting schools and teachers
