## Monday afternoon

Session | Location: | Convener: Sevil Salur

16:30–16:50 **Dijet asymmetry in PbPb collisions with the ATLAS detector**

**Speaker**

Laura Brittany Havener

16:50–17:10 **Quark-antiquark antenna splitting in a medium**

**Speaker**

Víctor Vila

17:10–17:30

**Suppression of baryon diffusion in a baryon rich strongly coupled quark-gluon plasma**

**Speaker**

Dr Romulo Rougemont

17:30–18:00 **Coffee break**

18:00–18:20

**Non-equilibrium properties of the QGP with a magnetic field: a holographic approach**

**Speaker**

Renato Critelli

18:20–18:40 **Jet quenching in strongly magnetized QGP: pQCD vs. AdS/CFT**

**Speaker**

Kiminad Mamo

18:40–19:00 **Jet-Hadron correlations at the LHC with ALICE**

**Speaker**

Joel Anthony Mazer

19:00–19:45 **Discussion session**

20:00
