

Hot Quarks 2016

Tuesday, 13 September 2016

Tuesday afternoon (16:30 - 20:05)

-Conveners: Rainer Fries

time	[id] title	presenter
16:30	[31] Phenomenological predictions of 3+1d anisotropic hydrodynamics	NOPOUSH, Mohammad
16:50	[39] Measurements of azimuthal anisotropy for high p_T charged hadrons in Au+Au collisions at $\sqrt{s_{NN}} = 200\text{GeV}$ at RHIC-PHENIX	TAKEDA, Akari
17:10	[53] A blast wave model with viscous corrections	Mr YANG, Zhidong
17:30	Coffee break	
18:00	[59] Anomalous transport model study of chiral magnetic effects in heavy ion collisions	SUN, Yifeng
18:20	[29] Rapidity Correlation Structure in Nuclear Collisions	ZIN, Christopher
18:40	[75] J/ψ azimuthal anisotropy in Au+Au collisions at $\sqrt{s_{NN}} = 200\text{ GeV}$	ZHOU, Chensheng
19:00	Discussion session
