

Session Program

12-17 Sept 2016

Hot Quarks 2016

Saturday afternoon

Saturday 17 September

16:30

Saturday afternoon

Session | **Location:** | **Convener:** Jorge Noronha

16:30–16:50

Deciphering the Charge Production Dynamics with General Charge Balance Functions at ALICE

Speaker

Jinjin Pan

16:50–17:10

Impact of early stage non-equilibrium dynamics on photon production in relativistic heavy ion collisions

Speaker

Lucia Oliva

17:10–17:30

Measurement of long-range azimuthal anisotropies in pp and $p+Pb$ collisions with the ATLAS detector

Speaker

Soumya Mohapatra

17:30–18:00

Coffee break

18:00–18:20

Multiplicity dependence of light flavour hadrons in small systems with the ALICE experiment

Speaker

Nicolo Jacazio

18:20–18:40

Spinodal instability of baryon-rich quark matter

Speaker

Feng Li

18:40–19:30

Discussion session

20:00
