

Hot Quarks 2016

Saturday, 17 September 2016

Saturday afternoon (16:30 - 20:00)

-Conveners: Jorge Noronha

time	[id] title	presenter
16:30	[51] Deciphering the Charge Production Dynamics with General Charge Balance Functions at ALICE	PAN, Jinjin
16:50	[18] Impact of early stage non-equilibrium dynamics on photon production in relativistic heavy ion collisions	OLIVA, Lucia
17:10	[49] Measurement of long-range azimuthal anisotropies in pp and $p+Pb$ collisions with the ATLAS detector	MOHAPATRA, Soumya
17:30	Coffee break	
18:00	[40] Multiplicity dependence of light flavour hadrons in small systems with the ALICE experiment	JACAZIO, Nicolo
18:20	[61] Spinodal instability of baryon-rich quark matter	LI, Feng
18:40	Discussion session
