WG4: Simulations and Software Tools
Session | **Location:** Kolympari, Crete, Greece, Room B

14:00–14:30 MHSP: scintillation from excited states
Speaker
Carlos Alberto Bastos de Oliveira

14:30–15:00
Penning transfers: survey of available data, life-time of excited states, pressure dependence
Speaker
Ozkan Sahin

15:00–15:15 break

15:15–15:45 Charging up of the dielectric in GEMs
Speaker
Gabriele Croci

15:45–16:15 Micromegas mesh transparency
Speaker
Konstantinos Nikolopoulos

16:15–16:30 break

16:30–16:50 Status of the GEANT4/GARFIELD Interface
Speaker
Alain Bellerive

16:50–17:00 Field solver and its possible application in the simulation of MPGDs
Speaker
Supratik MUKHOPADHYAY

17:00–17:30 Avalanche statistics (tbc)
Speaker
Heinrich Schindler

17:30
