## Monte Carlo modelling of Standard Model multi-boson production processes for 13 TeV ATLAS Analyses

*Tuesday 16 May 2017 15:40 (20 minutes)*

We present the Monte Carlo setup used by ATLAS to model multi-boson processes in 13 TeV  $pp$  collisions. The baseline Monte Carlo generators are compared with each other in key kinematic distributions of the processes under study. Sample normalisation and assignment of systematic uncertainties are discussed.
