Where do we stand 3 years after the recommendations from the BLRWG

Thursday, 5 March 2009 11:50 (30 minutes)

Following the recommendations of BLRWG, an extensive campaign of studies have been done to reduce the losses in the different machines of the injector chain or better manage the impact of radiation. In particular, the discussion is focused on the work done to improve the situation of the PS and future studies.

Presenter: GILARDONI, Simone

Session Classification: Session 3 - High intensity beams and radiation issues
