## Major events in the technical infrastructure in 2008

*Thursday 5 March 2009 14:00 (30 minutes)*

In 2008, the TI operators recorded 38 major events not related to LHC. These events primarily concern the injector complex. This talk will cover the different types of events occurring, study the recurring ones and show what actions have been taken after the events. It will also briefly describe how major events are dealt with in the TS Operations Committee and show what tools are available to the technical infrastructure operators.

**Presenter:** SOLLANDER, Peter

**Session Classification:** Session 4 - Technical infrastructure
