Electrical network: Compensators

Thursday 5 March 2009 14:30 (15 minutes)

This presentation outlines the current status of the Static Var Compensators at CERN. It explains the transfer of the SVC's from EN-EL to TE-EPC beginning of 2009, and the mode of operation in 2009. An overview is given on the results of the 2008 consolidation programme, as well as a summary of annual maintenance activities in shut-down 2008/2009. The presentation terminates with an outlook on future medium-term priorities.

Presenter: KAHLE, Karsten

Session Classification: Session 4 - Technical infrastructure
