Instrumentation status throughout the accelerator complex in 2008 –operation's point of view

Wednesday, 4 March 2009 11:00 (30 minutes)

A report will be given on the performance and issues of the beam instrumentation available to support machine operation throughout the CERN accelerator complex apart from the LHC. Difficulties of machine operation due to instrumentation problems will be highlighted.

Presenter: MIKULEC, Bettina

Session Classification: Session 1 - Operation in 2008 and outlook for 2009
