Controls issue in 2008 –operation's point of view

Wednesday, 4 March 2009 11:30 (30 minutes)

The accelerator chain encountered different problems related to the controls system in the large sense of the word. This presentation will give an overview of the issues concerned together with the applied solutions, where applicable, for the whole accelerator chain apart from the LHC. In the cases where no solutions were found or implemented, the issues will be addressed in more detail in order to urge for a solution prior to the approaching start up.

Presenter: STEERENBERG, Rende

Session Classification: Session 1 - Operation in 2008 and outlook for 2009
