## **Instrumentation throughout the accelerator complex: prospects for 2009**

*Wednesday, 4 March 2009 15:50 (30 minutes)*

During the 2008 run and 2008-9 shutdown several beam instrumentation systems have been upgraded, tested and targeted to be operationally deployed in 2009. In addition, the BI group has been re-organized following the 2009 restructuring. This presentation will present the agreed renovation plan, the corresponding progress and the BI organization put in place. It will also present possible impacts and consequences of a compressed shut-down on BI equipments for operation in 2010.

**Presenter:** GRAS, Jean-Jacques

**Session Classification:** Session 2 - Accelerator hardware and controls
