CERN accelerator controls renovation project

Wednesday 4 March 2009 16:20 (30 minutes)

This talk will recall the motivations for the Accelerator Controls Renovation Project and the major outcome of the workshop held in December 2008. The project will then be presented with a special focus on how operational objectives will be defined in the light of the new LHC operational planning.

Presenter: VANDEN EYNDEN, Marc

Session Classification: Session 2 - Accelerator hardware and controls
