## Physics requirements in the experimental areas in 2009 and beyond

*Friday, 6 March 2009 10:50 (30 minutes)*

Physics requirements in the experimental areas in 2009 and beyond –user requests and planning for for 2009 and beyond. The users schedule for 2009 will be presented. An increase of requests for the various testbeams (considering the upgrade for the LHC, the future ILC and the non-accelerator based experiments) has been observed. For the at present ongoing physics experiments I will give an outlook beyond 2009.

**Presenter:** BREUKER, Horst

**Session Classification:** Session 5 - Experimental Areas
