

What are the drawbacks of current DMPs?

- Personal view:
 - current DMPs are mostly:
 - Very short
 - Write once / read once / never checked
 - May not be applicable to the actual final product
 - Lacks details
- Key questions
- What do we learn from examples so far

What is holding DMPs back?

- Benefits
- Agreement on whether (A)DMPs are for re-use/preservation OR for evaluation to ensure the data will be handled properly in the project
- Tools
- Funder mandates
- Identifying commonalities
- Agreement on details to be addressed
