

The Italian Institute for Nuclear Physics (INFN)

Istituto Nazionale di Fisica Nucleare

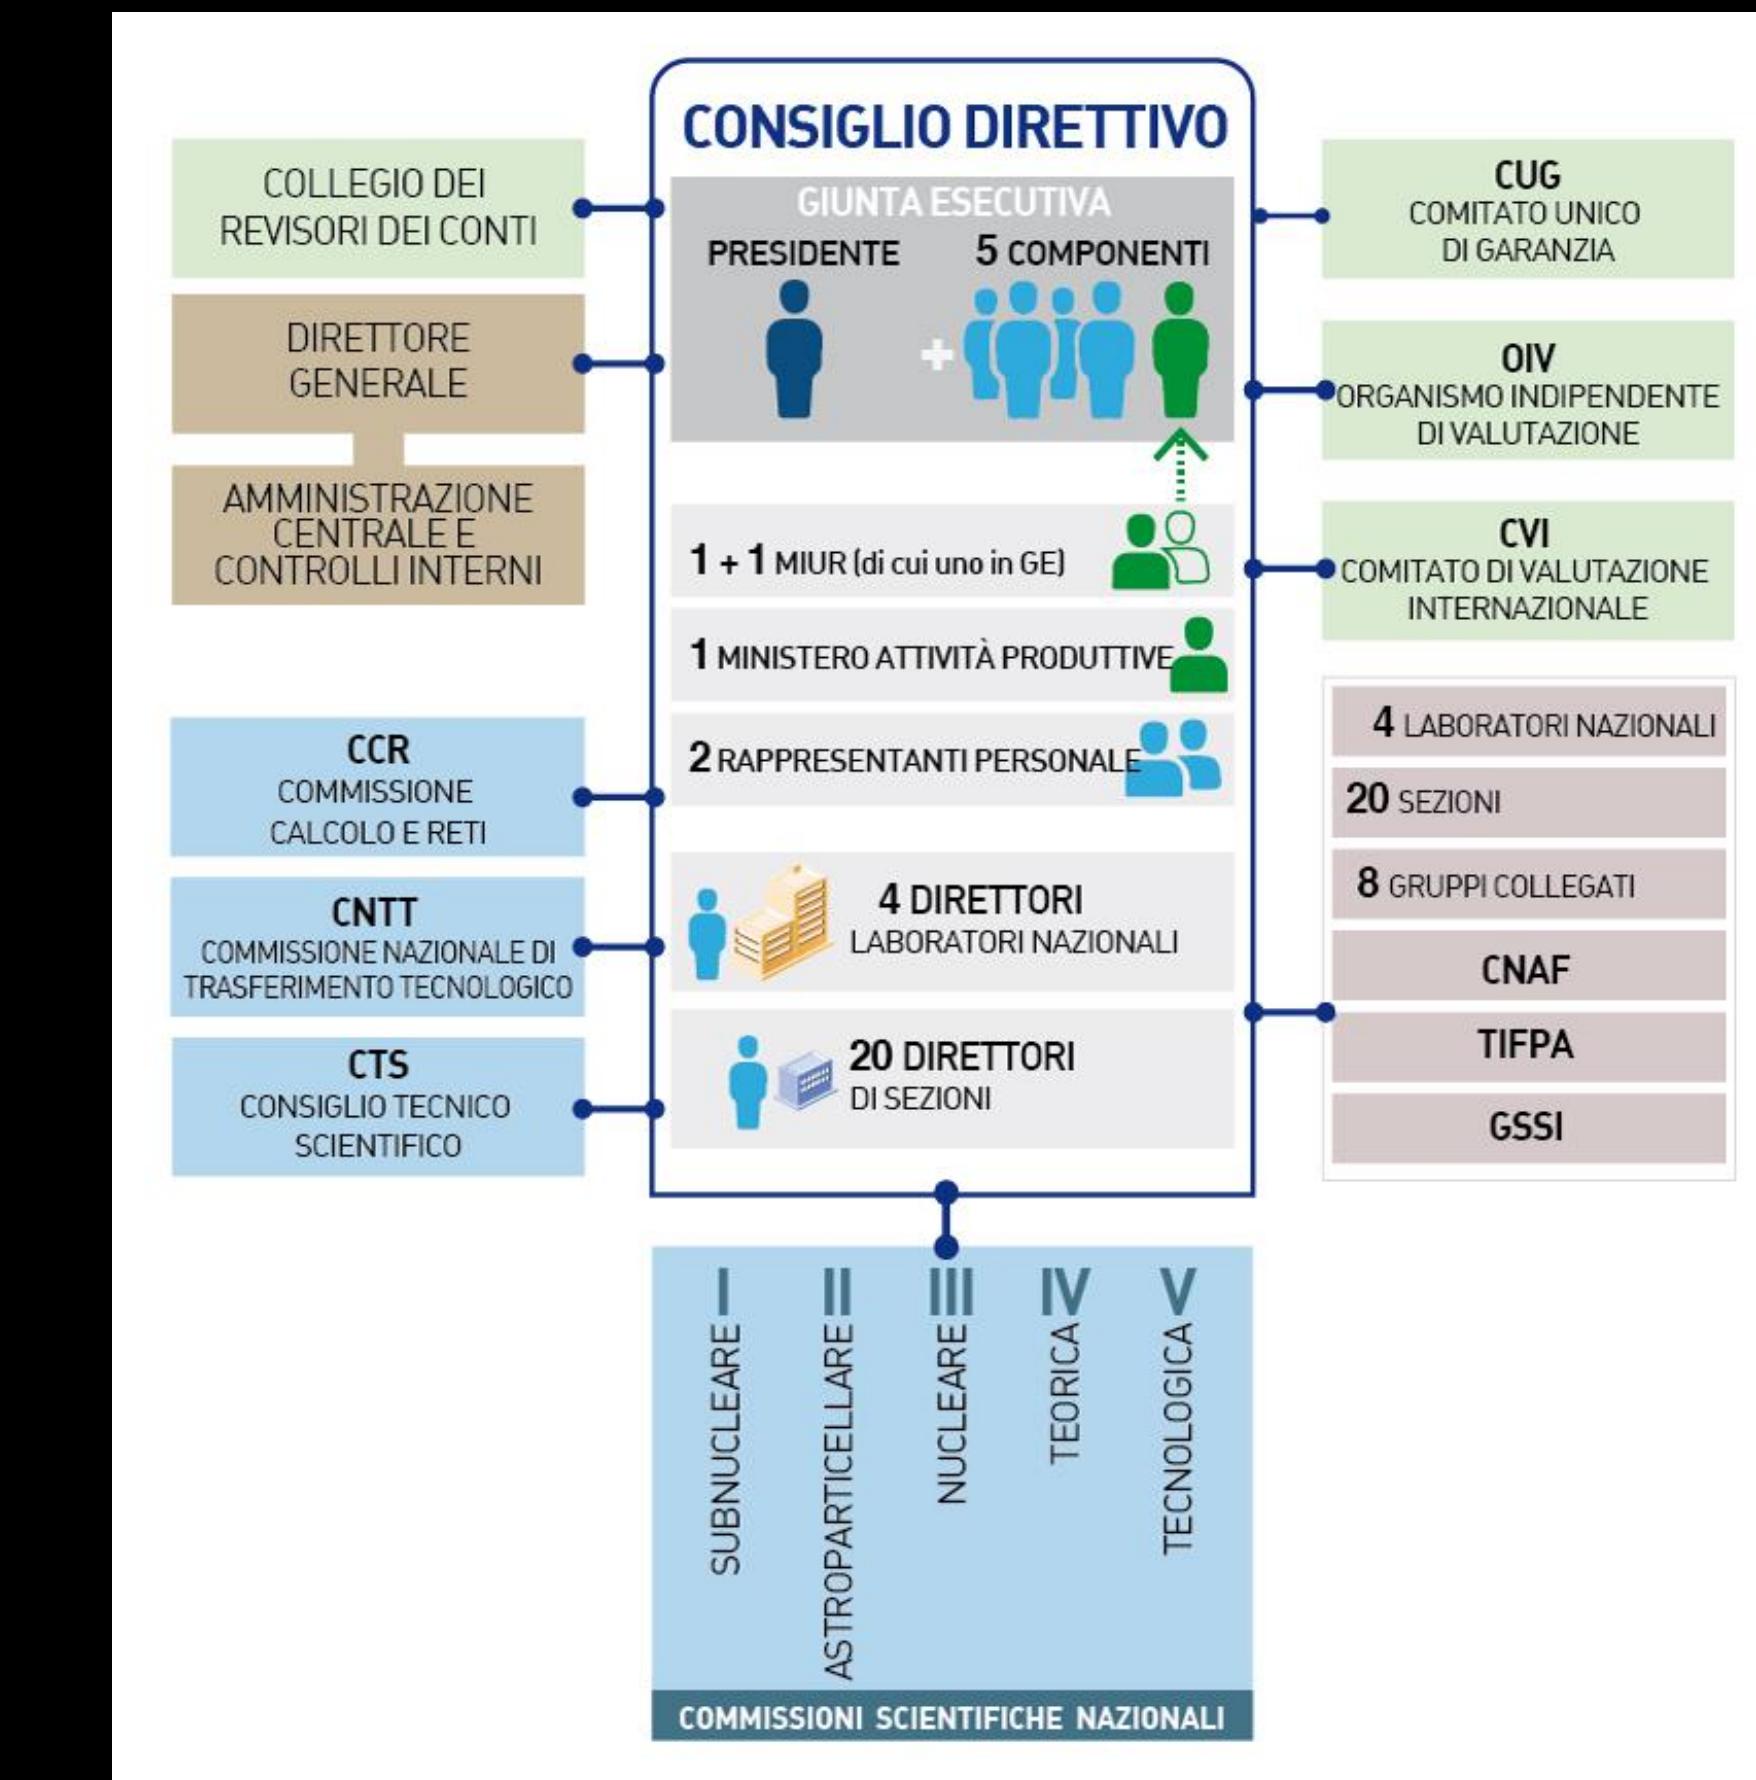

The largest scientific community in Italy

5.000 scientists

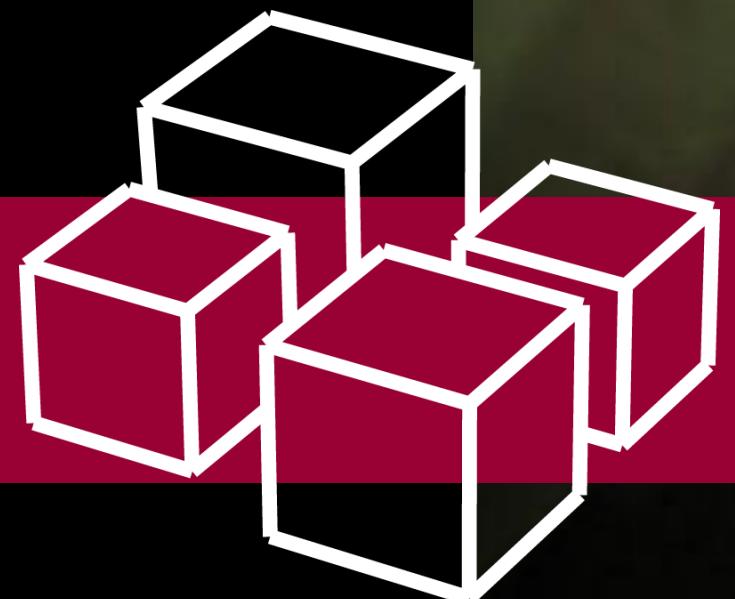

Widespread in Italy

20 divisions, 8 subunits, 3 national centres

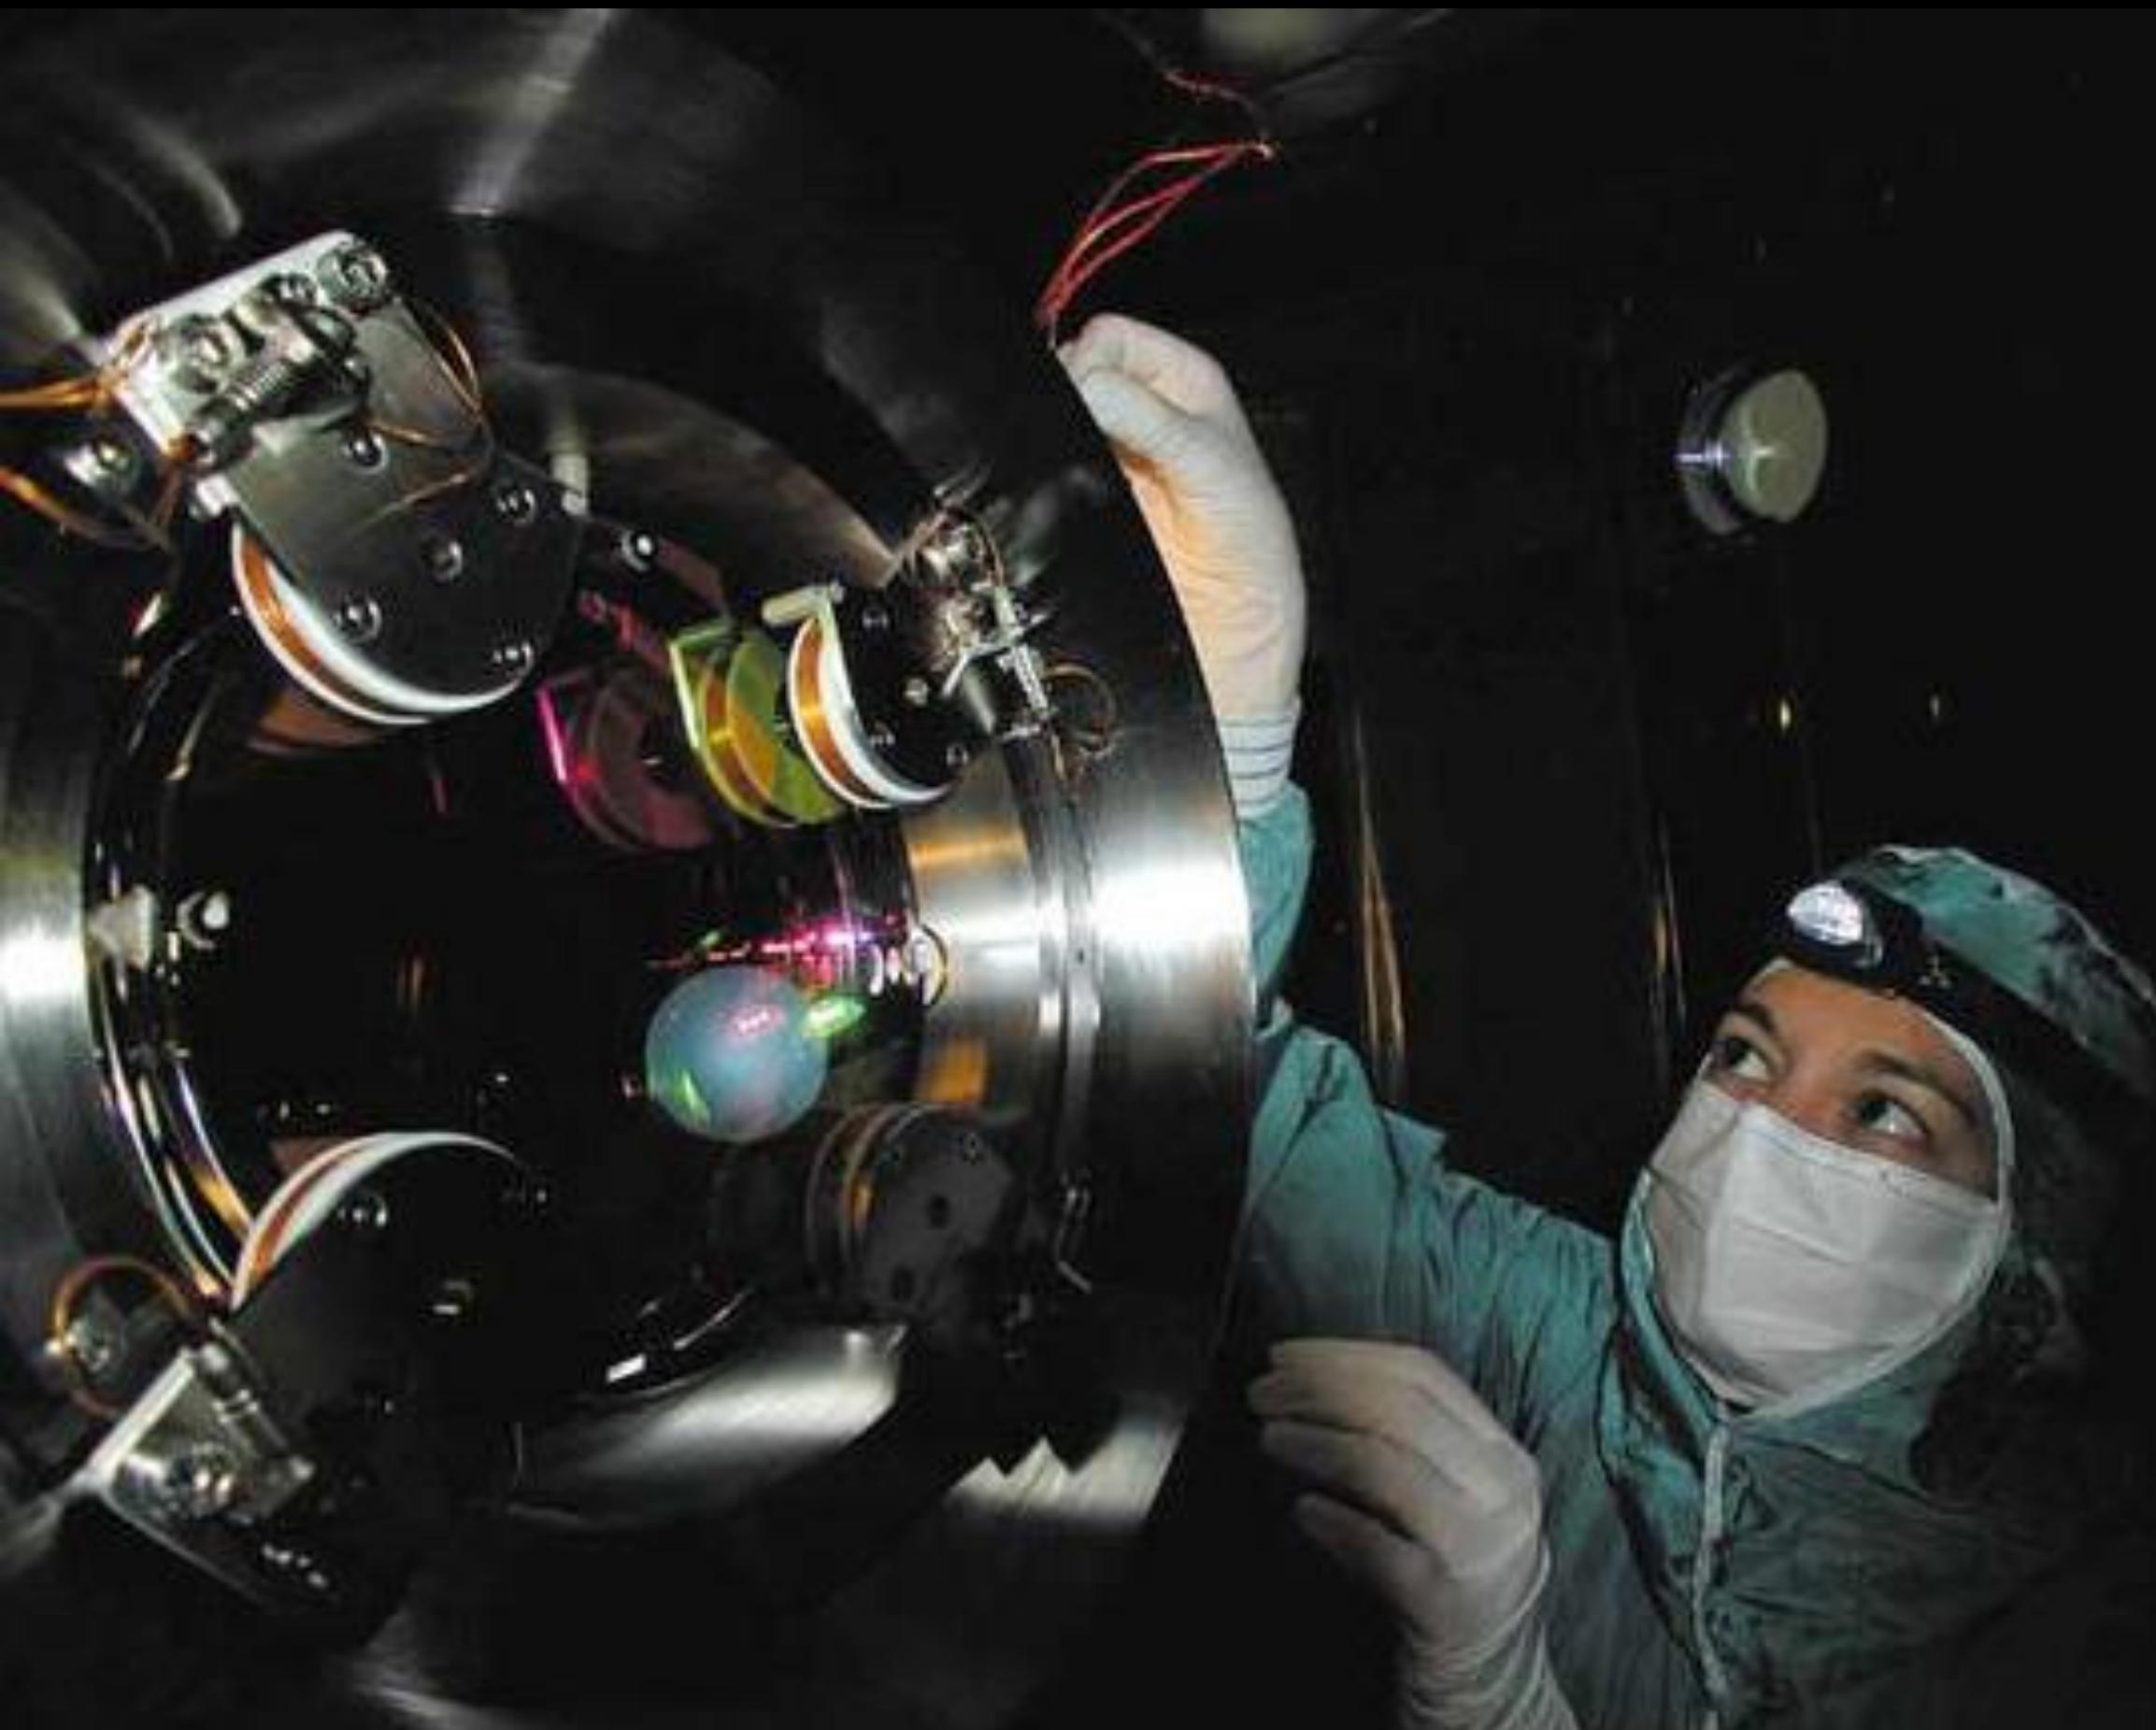

4 national laboratories

DARKSIDE, Gran Sasso National Laboratories

INFN is involved in all the most important

VIRGO, detector for gravitational waves

scientific endeavours worldwide

INFN has its roots in the group of via Panisperna

and continues the great tradition of Italian physics

At the heart of European science

The tunnel of the LHC at CERN

At the heart of European technology

ALICE, fiber optic

At the heart of International space missions

AMS - International Space Station

At the heart of European culture

LABEC centre - Firenze
