

# TRIUMF

Canada's national laboratory  
for particle and nuclear physics  
and accelerator-based science

## Accelerating Science, Innovation and Business for Canada

## Nuclear Physics

- Rare Isotopes – ISAC/ARIEL

## Particle Physics

- Energy frontier – ATLAS & LHC at CERN
- Neutrinos – T2K/HyperK in Japan, nEXO at SNOLAB
- Antihydrogen – ALPHA at CERN
- Neutron EDM – UCN facility at TRIUMF

## Accelerator Sciences

- Cyclotrons, SRF, linear accelerators, beam dynamics,
- RIB targets/sources, remote handling, beam diagnostics

## Materials Science

- MuSR, Beta-detected NMR

## Life Sciences

- Accelerator based medical isotopes
- Radiotracers for imaging and therapeutics
- Proton Therapy

## Advanced detector technologies

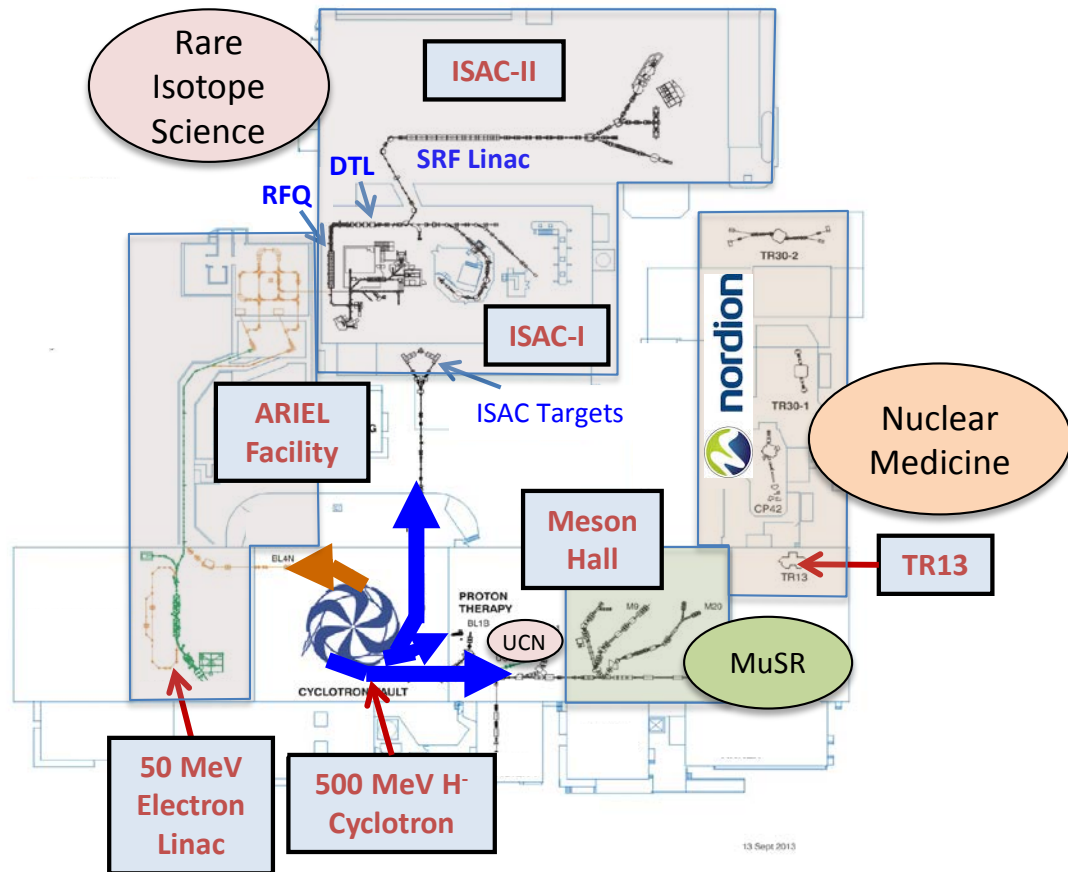

- SiPM, gas detectors, electronics

## Commercialization

- Technology transfer, licensing, spin-offs
- Irradiation services

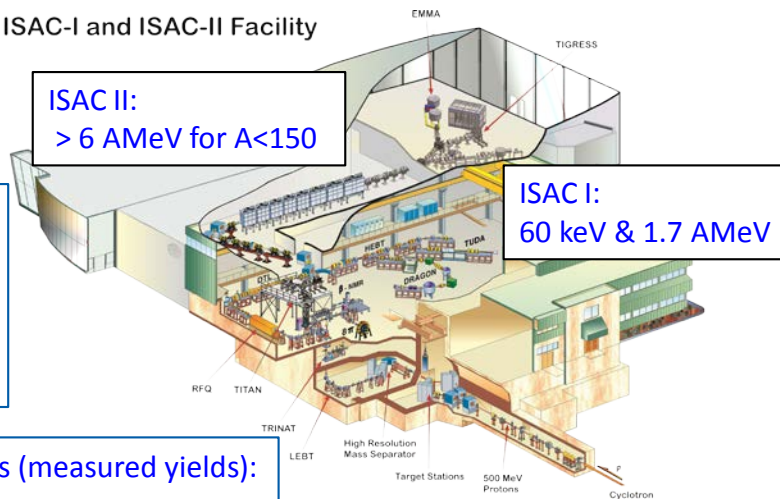

## TRIUMF Accelerators:

- 500 MeV, 350 $\mu$ A, H<sup>-</sup> cyclotron
- 4 medical isotopes cyclotrons (TR13, CP42, 2x TR30)
- ISAC 50kW ISOL facility
  - RFQ,  $3 \leq A/q < 30$
  - DTL,  $A/q \leq 7$ , 0.1-1.8 MeV/u
  - 40 MV Heavy Ion SC linac
- ARIEL e-linac (10mA, 30-50 MeV)

ISOL facility with highest primary beam intensity (100  $\mu$ A, 480 MeV protons)

ISAC-I and ISAC-II Facility

ISAC II:  
> 6 AMeV for A<150

ISAC I:  
60 keV & 1.7 AMeV

Select accelerated RIBs:

|                        |                     |
|------------------------|---------------------|
| $^{95}\text{Sr}^{15+}$ | $10^7$ pps          |
| $^{11}\text{Li}^+$     | $3 \times 10^3$ pps |
| $^{11}\text{Be}^+$     | $10^5$ pps          |

Selected beams (measured yields):

|                       |                 |
|-----------------------|-----------------|
| $^{26}\text{Al}$      | > $10^{10}$ pps |
| $^{37,38}\text{mK}$   | > $10^9$ pps    |
| $^{211-213}\text{Fr}$ | > $10^9$ pps    |
| $^{211}\text{Rn}$     | > $10^8$ pps    |
| $^{225}\text{Ra}$     | > $10^8$ pps    |
| $^{103}\text{Rb}$     | $\sim 3$ pps    |

## Programs in

- Nuclear Structure & Reactions
- Nuclear Astrophysics
- Fundamental Symmetries
- Material Science
- Nuclear Medicine

- $\sim 3500$  RIB hours / yr
- 600 users, 2/3 international, 5% from Japan
- Factor 2-2.5 oversubscribed
- $\sim 2$  year backlog
- Complementary capabilities to in-flight facilities like FRIB, RIBF
