

## Physics Beyond Colliders Kickoff Workshop

Contribution ID: 50

Type: **not specified**

### EDM options

*Tuesday 6 September 2016 16:40 (20 minutes)*

The storage ring technique to search for the EDM of the proton and deuteron is introduced. The accelerator physics and technical challenges are outlined. Work is ongoing worldwide to address these challenges and progress is briefly summarised. Physics motivation is discussed in a companion presentation at this workshop - 'EDM measurement in a proton storage ring'.

**Presenter:** BAI, Mei (Forschungszentrum GmbH)

**Session Classification:** Accelerator and infrastructure opportunities at CERN
