

LA³NET Novel Accelerators Workshop

23-26 October 2016, Paris

WORKSHOP OVERVIEW

Lasers will play a key role in the development of future particle accelerators by increasing the achievable acceleration gradient significantly, thereby reducing the size and costs of the facility.

This LA³NET Topical Workshop is focused on techniques using lasers for particle acceleration. The workshop will cover the science and technology of novel acceleration schemes for ion and electron beams including:

- Laser-driven wakefield acceleration
- Dielectric laser acceleration
- Beam-driven wakefield acceleration
- Scientific, medical and industrial applications.
