- **Model Assessment and tasks**
  - Introduction of GMT
  - GMT tasks pretty clear in EGEE
  - Some precisions for the post –EGEE-III needed : model to point at EGEE-III for EGI
- **Model Assessment and metrics**
  - GMT and ROD : workload assessment now as close as can be as in EGI
  - Metrics to point at EGE-III for EGI for model
- **Knowledge Sharing → add this on the model**
  - Centrally searchable KB, encourage regional GB KB,
  - Encourage searchable tickets or solution into gocwiki → best practices.
  - Set-up regional catch-up KB possible.
  - Info/outdated and Info/feed too much work to do but have somebody to contact for cleaning.
  - Discussion needed at SA1 meeting. Survey onto Roc managers
  - Useful according to NE : counting on existing structure
- **Operations procedure restructuring**
  - Release procedure by end of June
  - Upgrade of documents according to new model

**All federations are still on board to deliver smooth transition on-to EGI as we are still on-to EGEE-III:**

**Feedback on model is needed → Involvement in topics**
