Acknowledgements to a lot of collaborators

- *FOR WHAT PURPOSE?*

To create a **UNIQUE** web radio made, at CERN, by CERN people.

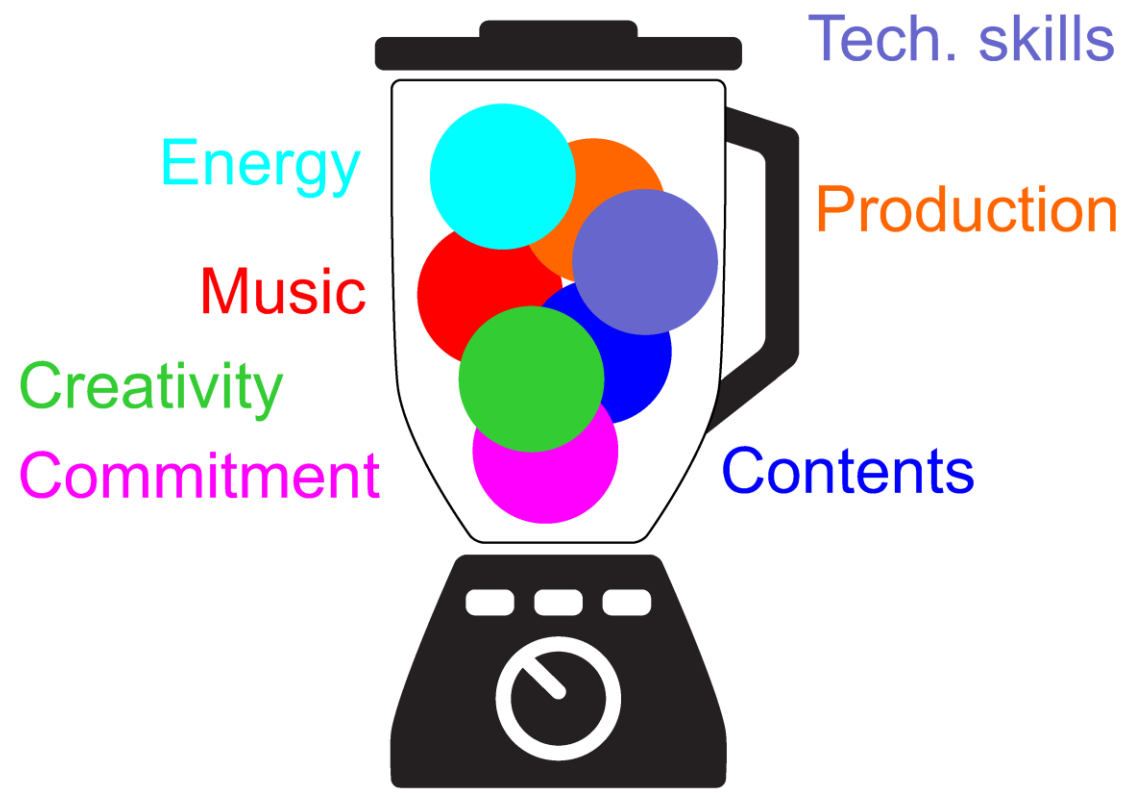

- *WHAT ABOUT?*

Our expertise: science and tech in the most general way, plus good music and fun.

- *FOR WHOM?*

The target Audience will be constituted by everyone has a **genuine interest for science, technology and innovation**, from the **high school guy** to the **senior scientist**.

*See the radio as a cake preparation...
...the ingredients...*

...Good but not tempting...

- **Broadcasting servers...**
- **Instrumentation** (mixers, audio signals treatment...)
- **Music and contents database management...**

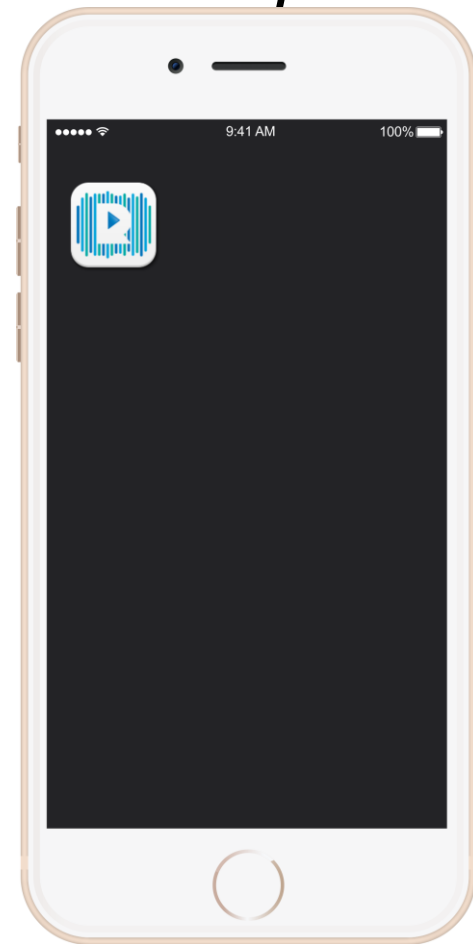

- **A cured and stylish website**
- **A catchy mobile app**

They are the visual interface with the listener!

We need a team of IT skilled volunteers to develop the radio portal and maintain our systems:

- ***Website developers***
- ***Mobile app developers***
- ***Content and social media managers***
- ***Broadcasting servers and instrumentation managers***

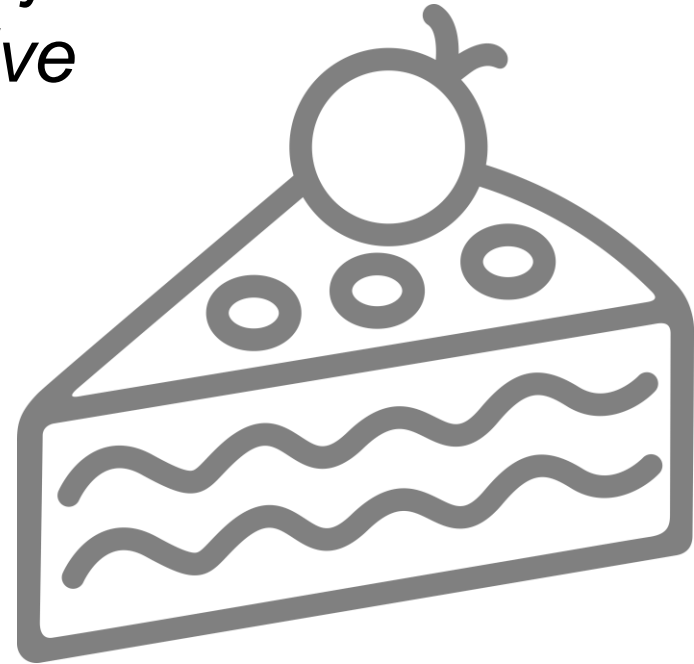

We value creativity and lateral thinking skills...

In “exchange” we can offer:

- *An interesting communication project*
- *A fun, stimulating and collaborative environment*
- *One of the **best pieces of cake** you will ever eat!*

Disclaimer:

The club is still in a proposal phase, even if an advanced preparation phase.

Thank you!
