

Experiment: Overview + DM

Thursday, 25 August 2016 13:10 (30 minutes)

Searches for invisible decays of the Higgs boson at the LHC

In this talk I will present an overview of searches for invisible decays of the Higgs boson undertaken at the ATLAS and CMS experiments. I will review recent results from direct searches for invisible decays as well as constraints from measurements of visible decay widths, and discuss available combinations and interpretations.

Presenter: MADSEN, Alexander (Deutsches Elektronen-Synchrotron (DE))

Session Classification: Experiment-Theory Joint Session
