

Determine the Frequency of future NuFact Workshops

This is a poll of the NuFact SPC to determine the frequency of future NuFact workshops starting with the next one to be located in Vietnam. The choices are:

A workshop every year with NuFact in Vietnam late summer of 2016.

A workshop every 18 months, alternating spring and fall, with NuFact in Vietnam spring of 2017.

A workshop every two years in the year that the NEUTRINO Conference is not scheduled with NuFact in Vietnam in late summer 2017.

Most popular option: several

A normally do not like the 1.5 format. It means that most, or at least half, of the meetings are in the academic year and harder for senior people to attend. If not every year, I would vote for non-neutrino years.

Note, that this workshop series plays an important role in the neutrino interactions community. It is always out of phase within the year from the NuINT series, which is Fall/Spring, so I favor the meetings more often for WG2 perspective.
