

WLCG Data News

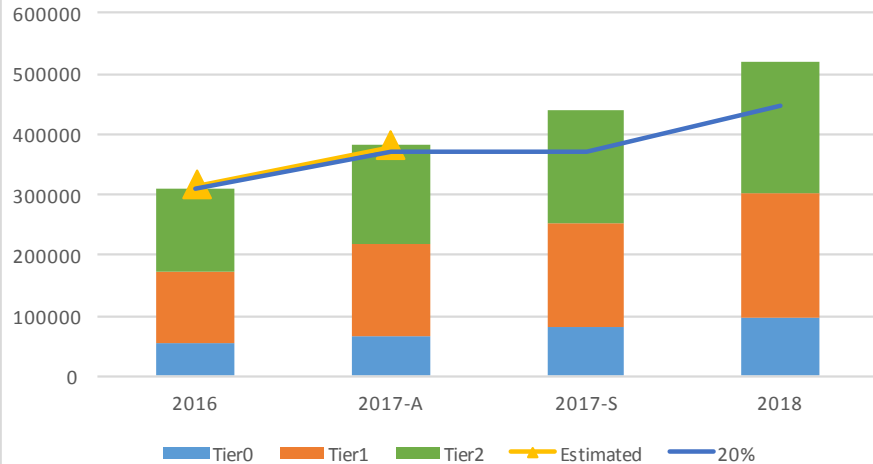

- The WLCG MB has endorsed a “steering group” to oversee the strategic direction of Data Management within the project
 - <http://indico.cern.ch/event/467577/>
- Representation;
 - 1 per experiment
 - 1 per storage provider
 - 2 or 3 for infrastructure
- Please let me know some names!

Data steering group

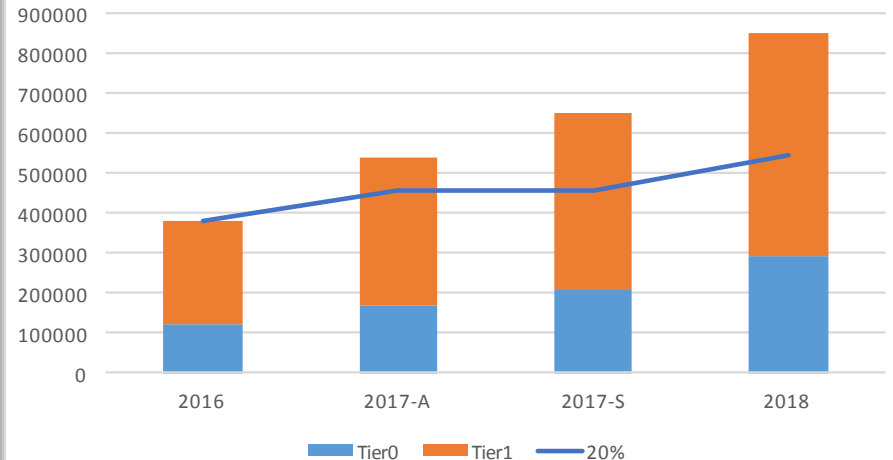

- The steering group
 - Considers long term WLCG strategy for data management
 - Exploitation of commonalities wherever possible
 - Tracks relevant technical themes
 - Meets periodically to define priorities
- And on that basis oversees
 - Forums
 - A regular pre-GDB
 - Focussing on medium term developments, open to all
 - WLCG data discussions in other forums, e.g. the WLCG Workshop
 - Triggering of dedicated, short-term task forces if necessary
 - Reporting & representation
 - Escalation, reporting and recommendations to MB
 - WLCG ops where requested
 - Representation of WLCG interests beyond the community

LHC: “outstanding performance”

Disk

Tape

Estimated: Estimates made in 2014 for Run 2 up to 2017

20%: Growth of 20%/yr starting in 2016 (“flat budget”)

WLCG Workshop Data Session

- Theme – “reducing the cost of storage”
 - Cost/volume
 - Volume occupied
- Many ways to attack this problem
 - See short doc attached to session agenda
- Objective – overview of which strategies are being pursued where
 - What can be done in common?
 - Are we missing any tricks?
