

## Minutes and action list of NUFACT SPC 28 June 2016

1. Overall agenda: a few plenary speakers still uncertain. (talks 2-2, 7-1, 7-4, 8-1, 9-2, 9-3 also Lykken and Dave Wark should be confirmed)
2. Many plenary (and parallel) speakers have not registered – could the people who invited them send a reminder? They will also be reminded ‘officially’ by Jacques.
3. Alain is working on making sure the meeting is advertised once more to the community.
4. Jacques requests from conveners how many abstracts have been accepted for talks and how many for posters. (this is largely covered by the WG conveners)
5. All agree that it would be great if the most important/innovative parallel session talks could be backed up by a poster. Could the WG conveners take initiative to invite ‘selected’ speakers to bring a poster with them?
6. We will try to generate a 45 minutes session on ‘the future of Nufact’ (starting maybe with a little historical retrospective?) on Thursday in the afternoon. Topics: organization, frequency and scope of nufact meetings. Alain will create a web page for documentation of these discussions and arguments. A layout of an international advisory committee will be drafted. Tord Ekelof will be invited next time.
7. **NEXT MEETING 15 JULY 14:00 UTC**
