

Managing EuPRAXIA publications

Publications based on EuPRAXIA work (funded by H2020)

Publications include articles in journals, talks, as well as posters which are related to results of the funded project and whose author is the PI or any staff member funded by the funded project. Furthermore the funded project team should collect all dissemination activities such as press releases, etc..

DESY (as coordinator) must ensure “open access (free-of-charge online access for all users) **to all peer- reviewed scientific publications** relating to project results within six months”. Therefore

- **Please acknowledge all publications with the following wording**
 - *This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No. 653782*

You are also obligated to use the EU emblem and the project logo, see also Article 29.2 of GA.

- **Please submit all publications in the DESY PUBDB (publication database)**
<http://bib-pubdb1.desy.de/>

By doing so, the document will be automatically transferred to the Open Air EU database and open access is ensured. Furthermore, it will be easier to collate the publication list which has to be submitted as part of the Financial Periodic Reports to the Commission due every 18 months.

If you insert the publication to the DESY PUBDB please take care that you fill in the grand agreement No. 653782 in field “Grant”.

If you need help or have any questions, please do not hesitate to contact:
library@desy.de; R. Thiele or A. Wagner
