

# LHC Seminar

SPEAKER: **MANSOULIÉ, B. (CEA/IRFU, Centre d'etude de Saclay Gif-sur-Yvette (FR))**

TITLE: **Recent results on Higgs measurements and searches in ATLAS**

DATE: Tue 11/10/2016 11:00

PLACE: 500-1-001 - Main Auditorium

## ABSTRACT

The excellent operation of the LHC, and a fast processing and analysis, has enabled ATLAS to produce many new results during the last months with similar or better sensitivity than the one reached during Run 1 of the LHC. The seminar will give an overview of the Standard Model Higgs boson measurements and of searches for non-standard scalar states or decay modes.
