

# Summary Wednesday “Morning” Session

Benedikt Hegner  
(CERN EP-SFT)

21.9.2016

# Challenges & “New” Ideas

- Parallelization
- Archive Event Store
- Quickly changing conditions
- Event Views
- Functional approach

From lunch discussion:

Are we sure we can separate **actual requirements** from **historical workarounds**?

# Discussion Topics

- Iterative approach for design
  - Where to put the emphasis?
  - How to get a proper global view?
- Simplicity and Testability
  - Lowering (perceived) entry level for analysis users
- Managing migrations
- Documentation!
  
- Possible hackathons
  - Event Store design
  - How to simplify the configuration system / add high-level concepts?
  - Serialization of configuration parameters
  - Cleanup / Modernization
  - Chances for I/O simplification

**Let's meet again at 17:30 to summarize the progress**
