Invenio @ JINR

Tuesday 21 March 2017 10:30 (10 minutes)

JINR open access repository, JDS (JINR Document Server), launched on the Invenio platform is functioning since 2009. Started with Invenio v.99 and now updated it to v.1.2.2.

JDS collections include published articles, books, theses, conference proceedings, audio, video materials, etc. Various methods of ingesting of documents into JDS and updating its content are applied: submission by authors, harvesting, (automatic) uploading. Further development of JDS is connected with the project "JINR corporate information system" aimed as information support of scientific researches performed at JINR. Within the project we are creating a collection "Authority" which is intended to be a core of this system.

Authors: ZAIKINA, Tatiana (Joint Institute for Nuclear Research); MUSULMANBEKOV, Genis (JINR); FILOZOVA, Irina (Joint Inst. for Nuclear Research (RU)); SEMENOV, Roman (Joint Institute for Nuclear Research (RU))
