GOCDB-PI
and direct DB connection

GOCDB-PI and client tools

- **3 months ago:**
  - 3 client tools were fully using GOCDB-PI
  - 8 had started working on the migration
  - 14 had not started or hadn't given any details

- **Today:**
  - 7 client tools are fully using GOCDB-PI
  - 8 are working on the migration
  - 9 have not started or have not given any details
  - 2 won't need to migrate (getting info from somewhere else or being deprecated)

in 4 weeks, direct DB connection will not be supported anymore!

Impacts

- **Some critical tools are not ready yet**
    - CIC Operations portal (work in progress)
    - GridView (work in progress)
    - Gstat (work not started)

- **Extending deadline is NOT a solution**
    - Implies delays in GOCDB- 4 release
    - Implies further delays on regionalisation
    - OAT milestones can't be met
