

Enabling Grids for E-science

Operational Security, from EGEE to EGI

Romain Wartel

CERN, IT Department

EGEE Operational Security Coordination Team

EGEE'09, Barcelona, Spain, 21-25 September 2009

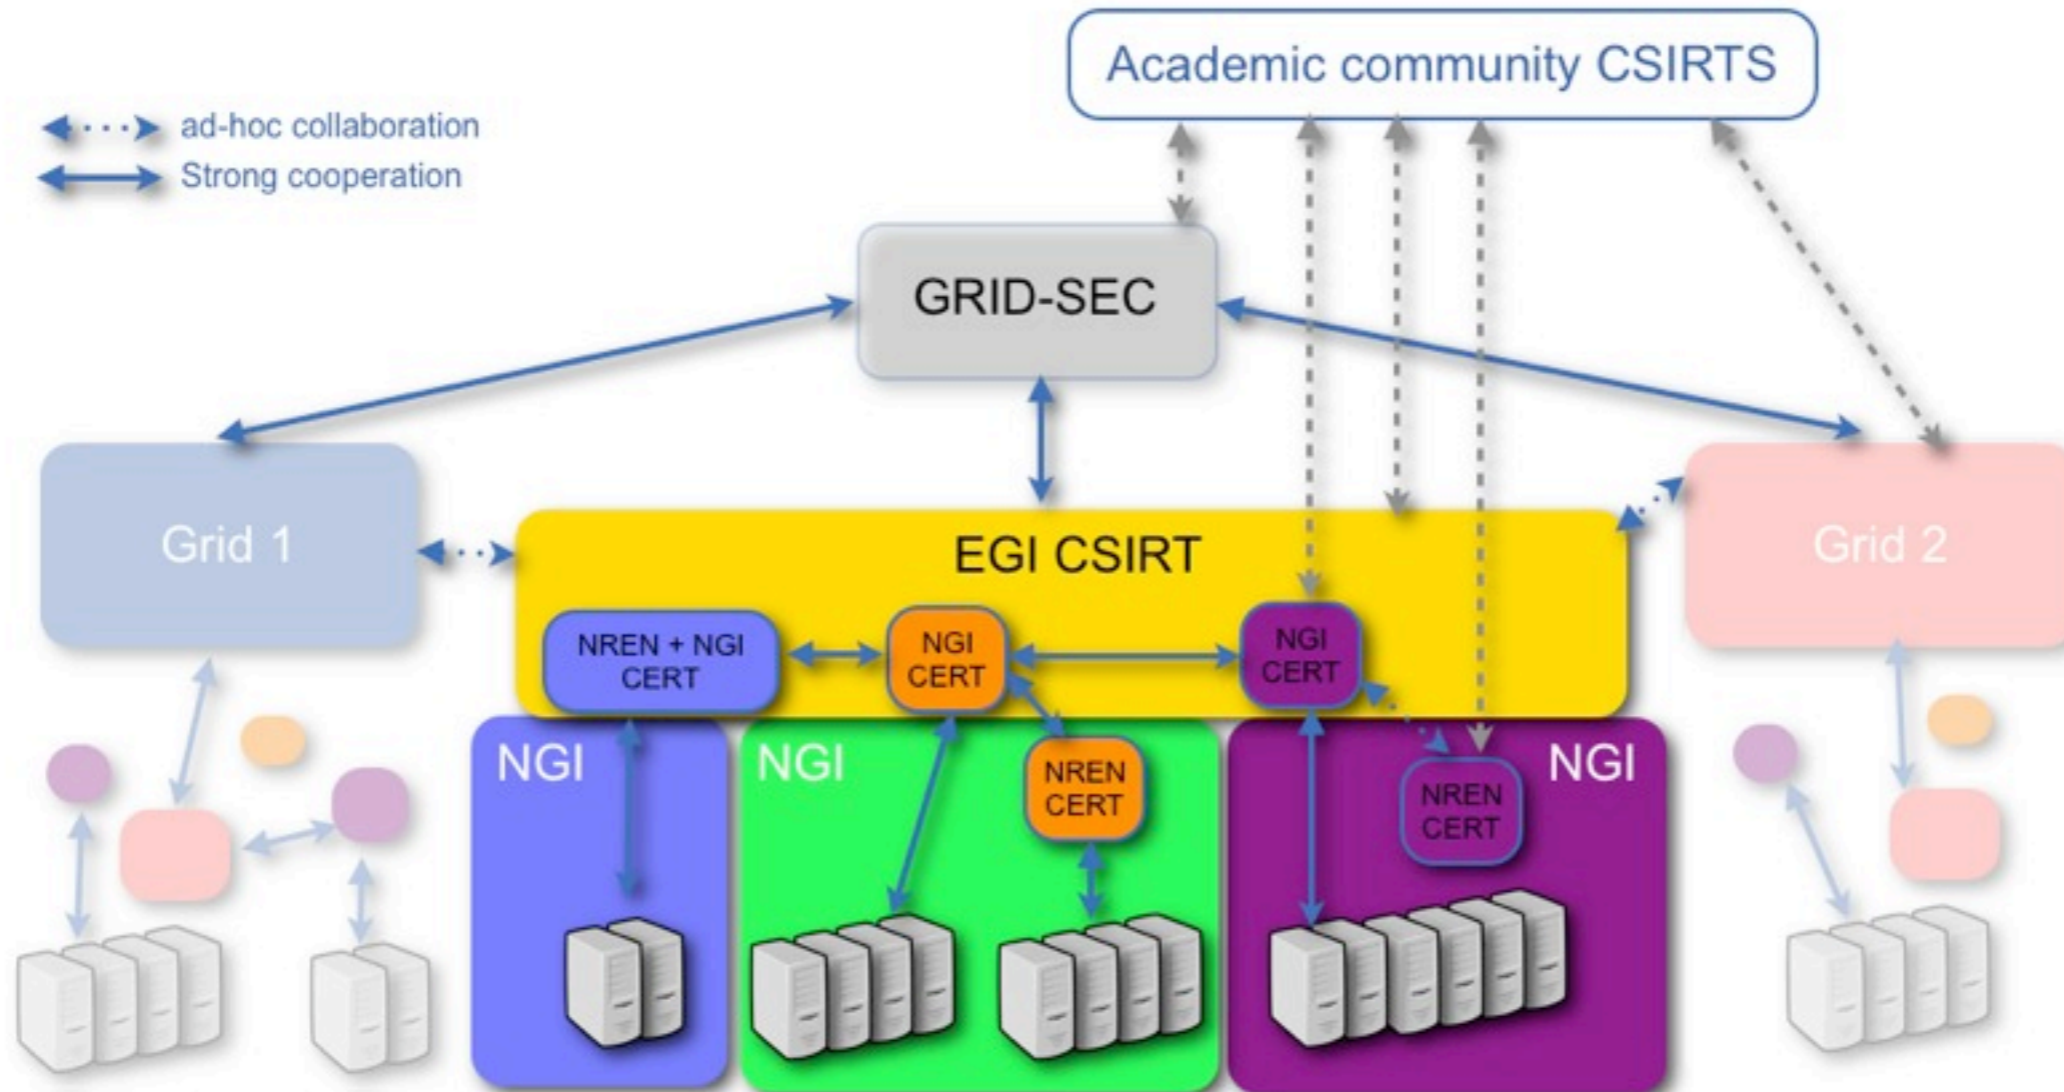

www.eu-egee.org

- **What would YOU like to see in EGI?**
- **What are the key strengths of the OSCT that we should preserve? How?**
- **How can we improve our current weaknesses?**

- **Proposed model?**

- **Transforming the EGEE OSCT in an EGI CSIRT**
 - Approach the NREN CERTs community (TF-CSIRT)
 - Establish the relevant structure, communication channels
 - Very similar to the current model

- **More details on the EGI CSIRT**
 - <https://twiki.cern.ch/twiki/bin/view/LCG/SCGLetter-EGI>
- **Forum to mutualise efforts and resources from the NGIs:**
 - Grid security monitoring
 - Security training and dissemination
 - Incident response improvement (ex: security drills)
- **"NGI Security Officer" to provide NGI CSIRT function:**
 - Coordinate the security activities within the NGI
 - Ensure the coordination of the resolution of security incidents in the NGI
 - Contribute to the EGI CSIRT
 - Act as a contact point for security issues in the NGI for the rest of the infrastructure
 - Participate in the EGI security groups as necessary
