## MPI Working Group Proceedings

*Tuesday, September 22, 2009 12:25 PM (15 minutes)*

### Abstract

The current MPI Working Group has been setup with two goals:

1. Find out why so few sites are supporting MPI.
2. Recommend upon increasing the versatility of MPI (or multi-core jobs in general) on the EGEE infrastructure.

Along the way, two other issues have become part of the MPI WG focus:

- a. The state of the current MPI install mechanism on gLite.
- b. The future support of MPI within EGEE.

These goals and issues will become part of a recommendation document of which the final version will be prepared shortly.

**Primary author:** Mr ENGELBERTS, Jeroen (SARA)

**Presenter:** Mr ENGELBERTS, Jeroen (SARA)

**Session Classification:** Support for MPI Applications within EGEE
