

# ESFRI project name

Your name, position and institute

# <project> in a nutshell

- Use one slide to state what your ESFRI project is about
  - More details can be put your poster in the exhibition hall

# ICT vision

- Explain how ICT (i.e. information and communication technologies) fits into the overall project

# ICT requirements

- Outline the major ICT requirements taking into account aspects such as:
  - Data sources (from the facility, outside sources etc.)
  - Storage needs (scale, longevity, update rate etc.)
  - Compute needs (e.g. scale and specific computing architecture requirements)
  - Networking (distribution of data sources, user communities etc.)
  - Security (for data access etc.)
  - Access for user community (estimate size of community)
  - Etc.

# ICT architecture

- If you have already defined an ICT architecture, provide a figure/overview

# Current Status & Timeline

- State what is the current status of your ICT planning
- Explain what is the timeline for the construction and operation of your project
- What are the key dates for your computing infrastructure?

# Challenges and Suggestions

- Highlight what you see as the major unresolved challenges for the ICT aspects of your project
- List any suggestions for how European ICT structures (grid, networks, super-computing) can work with/help your project)
