eGee

- Agenda
  - 3 Application talks
  - Operations
  - Monitoring of (site) reliability
  - MPI Working Group recommendations
  - Panel discussion
- Objective
  - To make clear what is currently going wrong in MPI support
  - To discuss what we can do about this in the short term
- Focus
  - No time for too many technical details
  - high-level project issues

Everybody needs to come away with a clear picture of what is the way forward.

Enabling Grids for E-sciencE

- Focus on problems we *may* be able to solve in coming few months.
- The project needs to take the support for MPI *very seriously*, and give it due priority.
- We're worried how MPI support is going to work in EGEE if everybody, including management, has other priorities.
- We're worried how MPI support is going to transfer to EGI.
- This calls for a *champion*, who has the *mandate* and the *power* to chase integrators/sites.
