

# Invitation to ISOTDAQ 2017

## Description:

ISOTDAQ 2017 dedicated to introduce MSc and PhD students to the "arts and crafts" of triggering and acquiring data for physics experiments. The main aim of the school is to provide an overview of the basic instruments and methodologies used in high energy physics, spanning from small experiments in the lab to the very large LHC experiments, emphasizing the main building blocks as well as the different choices and architectures at different levels of complexity. About half of the school time will be dedicated to laboratory exercises where the students are exposed to most of the techniques described in the lectures.

Date: 30. Jan. – 7. Feb. 2017

Vanue: Nikhef, Amsterdam

Website: <https://indico.cern.ch/event/557251/>

Registration closes on 1 November 2016
