

Foppiani Nicolo

I am Nicolò Foppiani, I was born in Santa Margherita Ligure (Italy) and I have been living in Italy since I was born.

Since I was a child I have always been interested in science and technology, and my passion for these topics has been continuously growing with me.

In 2012 I graduated at the Liceo Scientifico, a scientific high school, and afterwards I decided to continue my studies starting studying physics at the University. I successfully managed to get into Scuola Normale Superiore in Pisa, and in 2015 I graduated with my bachelor's degree at the University of Pisa discussing a thesis concerning "Precision Measurement of the Top Electroweak couplings at the FCC-ee". Last year I started attending a master's degree programme in Fundamental Interactions, focusing on experimental particle physics.
