Results from IDS

Thursday, 8 December 2016 16:15 (30 minutes)

A summary of the 2016 experimental campaign at the ISOLDE Decay Station will be presented alongside the preliminary results. The presentation will also include highlights of the already published results concerning the fast-timing study of ^{129}Sn , the beta-delayed proton emission measurement of ^{20}Mg and the ^{31}Ar multi-particle decay experiment.
