

## Gravitational Wave Symposium

Contribution ID: 3

Type: **not specified**

# Gravitational Waves from GR and Beyond

*Wednesday 26 October 2016 14:55 (25 minutes)*

I will review the theory behind gravitational waves: what are they and how do we calculate them in theory and practice, in particular for the aLIGO. I will then discuss what the recent LIGO detections can serve as tests of GR and other exotic physics.

**Presenter:** LIM, Eugene (KCL)
