

Session Program

15-18 Sept 2016

**Workshop on picosecond timing detectors for
physics and medical applications**

***Applications for Colliders, Dark Matter and
Neutrinoless Double Beta Decay I...***

Other Institutes
Kansas City

Sunday 18 September

09:00

Applications for Colliders, Dark Matter and Neutrinoless Double Beta Decay I...

Session | Location: Other Institutes, Kansas City

09:00-09:30

Potential for timing measurements at the Electron Ion Collider

Speaker

Michael Murray

09:30-10:00

Timing detectors for physics at the LHC

Speaker

Christophe Royon

10:00-10:30

CT-PPS project a the LHC

Speaker

Laurent Forthomme

10:30
