

Paul Nilsson

PILOT UPDATE

PanDA Pilot v 65.8

- Changes include
 - Looping job killer update to skip output from new version of memory monitor
 - User request to update AtlasOffline nightlies releases (same setup as AtlasDerivation; currently release string is missing)
 - Number of events, cpu time not recorded for preempted jobs (AES on HPC, now fixed)
 - Now reporting cpu time with heartbeats
 - New objectstore site mover (based on rucio site mover)
 - Service update incl. logging and minor fixes to facilitate job debugging on especially NERSC
- Contributions from W. Guan, T. Childers, P. Nilsson
- Release ASAP, pending final debugging/testing
