The Astronomy (IAG) Institute: Present Scientific and Technological Programme and perspectives

Monday, 23 January 2017 10:00 (30 minutes)

The Institute of Astronomy, Geophysics and Atmospheric Sciences (IAG) is one of the leading research and academic Institute in Brazil. Following the creation of its three departments in 1972, Graduate Programs were implemented for Astronomy (1973), Geophysics (1974), and Meteorology (1975). The BS Courses in Meteorology and Geophysics were opened in 1977 and 1986, respectively, and later completed by the BS in Astronomy (2009). The corresponding research activities include collaboration mainly with Europe, USA and Latin America.

Presenter: Prof. SODRE JUNIOR, Laerte (Head of IAG-USP)

Session Classification: Presentation of USP and of the Institutes and Schools that are organizing the School at USP
