

Dr Jacklyn Dias Reis received BSc and MSc degrees in electrical engineering with emphasis on Telecommunications from Universidade Federal do Pará (UFPA) in 2005 and 2007, respectively. Received PhD degree in Telecom from University of Aveiro (UA), Portugal, in 2012. He worked as a researcher on optical communications from 2007 to 2013 at Instituto de Telecomunicações - Aveiro. From 2013 to 2016, he was with CPqD, Campinas - SP, Brazil, as research specialist in the division of optical technologies as a research leader on optical systems and devices including the design of high-speed optical transmission and networking, digital signal processing and photonic integrated circuits. Since 2017, he has been working at BrPhotonics as an optical system manager focusing on the design and implementation of DSP-ASICs for high-speed optical communication systems. He has been involved in OIF - Optical Internetworking Forum where he was the technical editor for the optical transport 400G implementation project. He is an OSA and IEEE member and has more than 100 scientific papers published in top conferences and journals including 8 filled patents in the optical communications community.
