Flame Detector

Safety & Security

Supersensitive UV flame detectors based on wire- or GEM-type amplification structure

Invenio

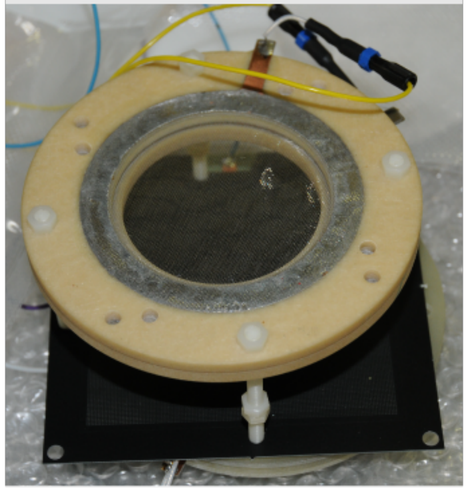
Education & conectivity

Invenio, the integrated digital library and repository system, is a suite of applications which provides the framework and tools for building and managing an autonomous digital library server

Flat panel solar energy collector

Energy

Solar collectors, in particular flat panel solar collectors, are well-known devices which are usually used to absorb and transfer solar energy into a collection fluid



Radon detector

Safety & Security

The "wall-less" GEM-type structure is capable of stable operation and high gas gain in humid ambient air and in photosensitive vapours including, TMAE.

Focus on 3 areas with great potential

User research and needfinding
(refugees + other actors)

Possess deeper understand of user needs and chosen areas of focus

Benchmark available technologies and solutions

User research at a deeper and more technologial level

Focus on one area

Analyse possible solutions

Deeper research on technology with practical aspects (cost, usability, ect)

User research on area of focus at a deeper level

Generate ideas

Build rapid prototypes

Test prototypes with users

Iterate

Evaluate economic viability of prototype and long term impact

iterative prototyping

finalise and build prototype

test final prototype

develop business plan

Research (Scrum-Ban)	Idea Generation (Scrum)	Prototyping & Testing (Scrum)	Final Product Prototype & Business Plan (Scrum)
- Cross functional teams working in pairs - Split work into tasks	- Work all together to generate ideas - Rapid prototyping	- Divide into 3 prototyping teams - User testing	Improve prototype and refine according to user feedback
- Self-selection of tasks from prioritised list - Periodical review of WoW	- Basic testing within team - Iterative work	- Parallel prototyping - Iterative improvements	Develop business plan
- Weekly long meeting, bi-weekly short meeting	- Put basic tested ideas into prioritised backlog for next stage	Gradual refining and focus on single final prototype	Iterate prototype development and install in field if possible
Daily update on WhatsApp	Updates as before	Updates as before + Adhoc meetings to re-orient (if necessary)	Update & review meetings at greater frequency
