Deep Learning on the Intel Nervana platform

Tuesday, August 22, 2017 12:00 PM (30 minutes)

This presentation will share details about the Intel Nervana Deep Learning Platform and how a data scientist can use it to develop solutions for deep learning problems. The Intel Nervana DL Platform is a full-stack platform including hardware and software tools that enable data scientists to build high-accuracy deep learning solutions quickly and cost effectively than with alternative approaches. The Nervana DL platform is available in two deployment options: the hosted Intel Nervana Cloud and the on-premise deep learning appliance.

Presenter: Dr PANCHUMARTHY, Ravi (Intel Corporation)

Session Classification: Plenary
